PASSENGER TERMINAL EXPO 2024

The Special Mobility team will be present to showcase our latest developments and products - will we see you there?

PASSENGER TERMINAL EXPO 2024 IS FAST APPROACHING, AND WE'RE READY

It's that time again – the Passenger Terminal Expo is back, and this year it will be held at Messe Frankfurt, Germany. As you may already know, this event offers the most significant opportunity for airports and airlines to discuss pressing matters regarding their business, including or course PRM transport solutions.

From PRM handling to providing a seamless journey, from efficiency to safety, Special Mobility is once again excited to showcase our commitment to solving PRM-related challenges with our Mobby products. We're bringing back products many people are already excited about, but even these products continue to get even better with time. We thoroughly explore the extend to which

we can enhance our products, whilst ensuring they remain as reliable as ever.

But that's not all – we're also thrilled to introduce some brand-new additions at the expo. One of our prides and joy, the Multimobby, will henceforth be available as an 8-seater! Plus, we're rolling out our XL-Mobby product lines and redefining the Mobby-SP in exciting ways. And that's

just the beginning – there's so much more in store that we couldn't even fit it all in this newsletter!

If you're intrigued, we'd love to have a chat with you at Stand B10 from April 16th to 18th.

Come say hello and discover how our solutions can elevate your passenger's experience.

THE NEW MULTIMOBBY 8-SEATER IS READY FOR PRODUCTION

The beloved 6-seater received a major upgrade suited for even larger airports.

The Multimobby has long been a fan favourite when it comes to transporting numerous passengers at once throughout the days. Filled to the brim with well thought out features, it maximises safety whilst sacrificing the least amount of user friendliness. It's sharp and futuristic design can even be enhanced with a custom appearance of your own corporate identity, the sky is the limit!

And what if we told you, it now even comes as an 8-seater? That's right – it's the upgrade tailored to the needs of bustling airports with immense passenger traffic. Despite the additional capacity, it retains all the safe and efficient features of the 6-seater while maintaining its durability – it's just as strong.

Peaked your interest? Our specialists will gladly discuss a quote with you!

THE ENHANCED MOBBY-SP

Upgraded to perfectly match the ECAC norm whilst maintaining everything that makes the Mobby products desirable.

At Special Mobility, we firmly believe that every passenger, regardless of mobility, has the absolute right to navigate any environment independently, including bustling airports. That's why we've been dedicated to optimizing our Self-Propelled Mobby, the Mobby-SP, to closely adhere to **ECAC guidance and codes of conduct** while retaining all the unique and desirable traits of our Mobby product line. Notably, it remains fully compatible with our other products, including the Link&Go, and offers the same range of options as other Mobby models.
